

HELP Me.  
i GOT LOST. :(

**A PET IS LOST EVERY 7 SECONDS.**

**THAT MEANS 1 IN 3 PETS WILL GO MISSING.  
WITHOUT AN ID, 90% WILL NOT RETURN HOME.**

Of all lost  
**CATS**

Of all lost  
**DOGS**

**25%**

**7%**

ARE NEVER FOUND

**36%**

**30%**

INCREASE IN LIKELIHOOD OF BEING REUNITED DUE TO MICROCHIP

**4** out of **10**

PET MICROCHIPS ARE NOT REGISTERED LEAVING 40% OF PETS  
MISSING VITAL OWNER INFORMATION

## HOW DOES MICROCHIPPING WORK?

*A microchip is the size of a grain of rice, and has a unique ID number that is registered with your information.*

*The implant is administered like a vaccine, and virtually painless to your pet. At the same time, THRIVE microchips will automatically register your information*

*You can also register your pet's microchip ID number at [FOUND.ORG](https://FOUND.ORG), a national registry of pet microchip IDs.*

*Whenever a reader is passed over the microchip in a pet, a unique number will populate which gives the ability to contact the registered owner so the pet can be safely returned home.*

Remember, a microchip is not a GPS unit which will locate your pet.

It serves as another way to quickly identify your pet if your pet's collar or tag have fallen off. Protect your pet today with the peace of mind that only microchipping can provide.

**For just \$35, get our auto-registered microchip  
for your beloved pet that can be read  
anywhere in the world.**
